

Table of Contents

Editorial Board of Journal of Global Positioning Systems	i
Review of triple-frequency GNSS: ambiguity resolution, benefits and challenges	1
Bofeng Li	
BDS code bias periodical mitigation by low-pass filtering and its applications in precise positioning	12
Xin Li, Keke Zhang, Yongqiang Yuan, Xiaohong Zhang and Xingxing Li	
GPS + Galileo tightly combined RTK positioning for medium-to-long baselines based on partial ambiguity resolution	24
Guangcai Li, Jianghui Geng, Jiang Guo, Sen Zhou and Shuang Lin	
Dynamic characteristic of the forth road bridge estimated with GeoSHM	34
Xiaolin Meng, Ruijie Xi and Yilin Xie	
A new approach for cycle slip detection and fix using single GPS receiver's single satellite dual frequency data containing arbitrarily large pseudorange errors	49
Zhizhao Liu	
A hybrid error modeling for MEMS IMU in integrated GPS/INS navigation system ...	70
Maged Ismail and Ezzeldin Abdelkawy	
Accuracy analysis of GPS/BDS relative positioning using zero-baseline measurements	82
Gethin Wyn Roberts, Xu Tang and Xiufeng He	
Spatiotemporal variability of water vapor over Turkey from GNSS observations during 2009–2017 and predictability of ERA-Interim and ARMA model	90
Kutubuddin Ansari, Ozsen Corumluoglu, Sampad Kumar Panda and Payal Verma	
Development of a GPS spoofing apparatus to attack a DJI Matrice 100 Quadcopter ..	113
Eric Horton and Prakash Ranganathan	
A MIMU/GPS/magnetometer integrated alignment method based on sequential robust estimation	124
Shida Wang, Jian Wang, Hang Yu and Haobo Li
