Articles

Refinement of elevation angle based stochastic model and positioning performance for QZSS

Zong, Yao; Kaifei He[✉], Xuchen Ma; Kai Ding; Yu Fu and Xiang Xu 1

Double layer dynamic target capture algorithm based on improved EKF and GBNN

Sun, Qian; Xingyu Zhou; Weiyang Zhao and Jiang Xing13

Real-time kinematic performance evaluation of Mosaic-H GNSS receiver on UAV platforms under diverse environmental conditions

Mnar Hmdy Abdalazeez Salem Saad, Ahmed Wasiu Akande, Odai Redhwan Mohammed Othman and Dongkai Yang26

Landslide hazard levels analysis considering displacement traction

Chen, Xingchi; Yuzhi Mneg; Junzhe Zhou; Yutao Zhou; Junzhe Zhou; Zhengdong Leng and Kun Wang45

A deep learning-based regional atmospheric weighted mean temperature model for China

Jiang, Ruizhao[✉]; Bo Li and Huizhong Zhu57

Precision evaluation in discrete Kalman filtering: A Posteriori Perspective

Wang, Jianguo; Benjamin Brunson[✉] and Boxiong Wang69

PhD Dissertation Abstracts

Structural health monitoring based on integration of GNSS and in-situ sensors

Xuanyu Qu88

Smartphone precise positioning in urban environments using internal GNSS and IMU sensors

Yi Ding91
